

## Safran Oil Systems Will Pursue Sustainability Certification, Carbon Neutrality and ESG Compliance

Safran Oil Systems, a 36,250 SF manufacturer of commercial airline oil tanks, located in Fort Myers, FL, and operating as a subsidiary of Safran Aero Boosters, a \$1B, Belgian-based global leader in lubrication units, oil tanks, heat exchangers, and special valves, has decided to pursue the Edenark Group ISO 14001 environmental sustainability certification program.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world's most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

“We are best of class in aircraft engine oil tanks development and production and accept the responsibility of leading from the front,” said Jean-Pierre Posset, of Safran Oil Systems. “Our organization, including our employees in Florida and the rest of the world, cares deeply about the environment and sustainability. We are excited to pursue this certification and join the others around the world that have chosen to be part of the solution.”

“When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up. They are setting a higher bar for their organization and sending a signal to all those around them,” says David Goodman, CEO of Edenark Group. “They are agreeing to adhere to the world’s Gold standard for sustainability certification; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improving in every way.”
