

Tess Omo Technologies, Ltd excited to work with Edenark Group on Sustainability Certification, Carbon Neutrality and ESG Planning Process

Tess Omo Technologies, Ltd, an Ireland-based waste technology company that is building out its service platform, is excited to be under contract with Edenark Group on the Edenark Group ISO 14001 environmental sustainability certification program.

“Our business is designed to reduce waste in an environmental way and recycle client waste back into energy,” says Eugene Ugiagbe, CEO of Tess Omo Technologies, Ltd. “Our mission is to help organizations repurpose their waste while also reducing their carbon footprint. Full transparency is critical to our mission. So, partnering with Edenark Group, which, from our research, offers the top sustainability certification, carbon neutrality and ESG planning process on the planet, was a perfect fit”

The Edenark Group ISO 14001 is the world’s premier environmental sustainability certification program and allows small to mid-sized enterprises the ability to attain the world’s most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and start their ESG planning process, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement.

"Tess Omo Technologies, Ltd is the kind of organization we love to work with – committed to sustainability and evolving as an organization. We are excited to be able to provide advice as they continue to grow and develop," said David Goodman, CEO of Edenark Group.
