

## **TLBISBIG Consulting Group, LLC Will Pursue Sustainability Certification, Carbon Neutrality and ESG Compliance**

TLBISBIG Consulting Group, LLC ( <https://www.tlbisbig.com/> ) is a global operation operating an international network of suppliers, buyers and other partnerships to provide clients with operational guidance, AI technology and medical protective equipment. The company has decided to pursue the Edenark Group ISO 14001 environmental sustainability certification program.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world's most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

“We are a leader in our space. We set a high bar and our clients look to us for guidance,” said Terence Bolden, Founder and CEO. “We are passionate about doing the right thing for the environment and the communities we serve. The recent IPCC climate report is an urgent call to the world's business community for action. The Edenark Group ISO 14001 program provides us the platform to proudly respond to that call and show we choose to be part of the solution.”

"When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up. They are choosing to lead by example," says David Goodman, CEO of Edenark Group. "They are responding to the call to take action for the environment and future generations by agreeing to adhere to the world's Gold standard for sustainability certification; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improving financially, operationally and environmentally."
