

Com-ESCO™ to Pursue Sustainability Certification Via Edenark Group ISO 14001 Program

Com-ESCO™ (<http://www.com-esco.com/>), a South Florida-based, licensed and insured general contractor and commercial Energy Services Company, and parent of Sustainable Performance Solutions (<https://www.susperfsol.com/>), Sea Coast Window & Door (<http://seacoastwindow.com/>), Professional Window & Door (<https://prowinfl.com/>), and National Aluminum Fabricators, has decided to pursue the Edenark Group ISO 14001 environmental sustainability certification.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) a program designed and priced specifically for them.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"We provide ASHRAE energy audits and are a leader in energy efficiency credentialing, commissioning, and sustainability consulting", said Mike Modica, principal in com-ESCO. "We intimately know the sustainability space and via our various companies, provide products, services, auditing and credentialing, to a large number of clients, domestically and internationally. We have worked with Edenark Group for years and our views, expectations and standards align with their views, expectations and standards," added Modica.

"When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up. They are setting a higher bar for their organization and sending a signal to all those around them," says David Goodman, CEO of Edenark Group. "They are agreeing to adhere to the world's Gold standard for sustainability certification; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improving in every way."
