

### **CPL Group USA Becomes Environmentally Certified Sustainable Company**

CPL Group USA ( <http://cplgroupusa.com/> ) heads a group of companies that are synergistically aligned to provide end-to-end electric grid infrastructure management services to commercial, institutional, industrial and residential buildings. CPL’s founders have been in the Energy Management business for over 35 years, positioning the company to national prominence in the industry. The company has become environmentally certified sustainable under the Edenark Group ISO 14001 environmental sustainability certification program.

The Edenark Group ISO 14001 is the world’s premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world’s most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

“We are a leader in our space and our innovative approach to infrastructure management helps commercial real estate owners set and achieve their sustainability goals,” says Dario Gristina, Chairman/CEO of CPL Group USA. “We are passionate about all businesses and buildings, no matter what their size, having a profitable sustainability program. We also recognize the impact the SEC rule changes will have on organizations; and wanted to ensure that we are a solution for our clients who, as part of their own sustainability programs, need their vendors to also be certified sustainable.”

"When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up. They are setting a higher bar for their organization and sending a signal to all those around them," says David Goodman, CEO of Edenark Group. "They are agreeing to adhere to the world's Gold standard for sustainability certification; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improving in every way."
