

### **CPL Group USA Inc. has renewed its Environmental Sustainability Certification through 2023**

CPL Group USA ( <http://cplgroupusa.com/> ) heads a group of companies that are synergistically aligned to provide end-to-end electric grid infrastructure management services to commercial, institutional, industrial and residential buildings. CPL's founders have been in the Energy Management business for over 35 years, positioning the company to national prominence in the industry. The company has continued its environmental sustainability commitment by renewing and extending its Edenark Group ISO 14001 sustainability certification through 2023.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world's most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"We are a leader in our space and our innovative approach to infrastructure management helps commercial real estate owners set and achieve their sustainability goals," says Dario Gristina, Chairman/CEO of CPL Group USA. "We are passionate about all businesses and buildings, no matter what their size, having a profitable sustainability program. We also recognize the impact Local Law 97 and other regulations will have on organizations; and are a solution for our clients who, as part of their own sustainability programs, need their vendors to also be certified sustainable."

"In 2022, while also rebuilding from the impact of the pandemic, our team was able to complete ten projects, including reducing paper, reducing light cost, reducing HVAC cost, reducing plastic, increasing digital invoicing, reduction in travel cost, recycling. Further, the Green Team has an exciting list of projects scheduled for 2023," added Gristina.

"CPL Group USA, Inc. is a wonderful example of what the world needs more of – an organization that produces a superior product, supports its current stakeholders, shows it cares about future generations via its commitment to sustainability certification, and makes more money due to its sustainability programs," said David Goodman, CEO of Edenark Group. "When an organization executes the Edenark Group ISO 14001 sustainability certification, as CPL Group USA, Inc. is doing, it not only benefits the environment, but it also benefits its own operation," added Goodman.
