

Haymarket Media, Inc. Has Become a Certified Sustainable Company

Haymarket Media, Inc. has been certified under the Edenark Group ISO 14001 sustainability certification program for its New York City offices.

Haymarket Media, Inc. is the US division of global media company Haymarket Media Group, which is internationally recognized for its environmental commitment, is already ISO 14001 and ISO 50001 accredited in its UK offices.

The ISO 14001 is the world's premier environmental sustainability certification and Edenark Group's certification program allows SMEs (small to mid-sized enterprises) to attain the world's most popular environmental certification standard via a program designed specifically for them.

Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the ISO 14001 as a foundation for long-term compliance. The program helps organizations define how they interact internally, externally and with the environment, and focuses on its continual improvement in these areas.

"As a business we recognize our broader responsibility to society and our brands regularly cover topics of corporate purpose, positive impact, and work hard to use their influence for good. Becoming ISO 14001 accredited is a proud moment for Haymarket in the US and our teams have worked hard to make it happen," said John Crewe, data protection officer, Haymarket Media, Inc.

"Not only do we want to do the right thing for the environment in our own offices, we also want to lead by example for other organizations in the United States and around the world. Following the world's top sustainability standard allows everyone to adhere to the same framework and principles the UN follows."

The certification incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and doing the right thing for the environment and current and future generations.

"When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are setting a higher bar for their organization and sending a signal to all those around them," said David Goodman, CEO of Edenark Group. "They are agreeing to adhere to the world's gold standard for sustainability certification; are choosing to be a leader and part of the solution; and are joining an elite community of over 300,000 organizations, in over 150 countries, that have committed to continually improving in every way."
