

Heritage Investment Group Inc. has renewed its Environmental Sustainability Certification through 2023

Heritage Investment Group (<https://heritageinvestment.com/>), with over \$1b under management, provides wealth management and investment guidance to high-net-worth individuals, families, charitable foundations, and qualified plans. The firm has served as an independent advisor since 1993. The company has continued its environmental sustainability commitment by renewing and extending its Edenark Group ISO 14001 sustainability certification through 2023.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world's most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"Edenark Group has a 25 year relationship with Heritage Investment Group and they are a wonderful example of what the world needs more of – an organization that produces a superior product, supports its current stakeholders, shows it cares about future generations via its commitment to sustainability certification, and makes more money due to its sustainability programs," said David Goodman, CEO of Edenark Group. "When an organization executes the Edenark Group ISO 14001 sustainability certification, as Heritage Investment Group is doing, it not only benefits the environment, but it also benefits its own operation," added Goodman.
