DataSetGo has renewed its Environmental Sustainability Certification through 2023

DataSetGo (<https://datasetgo.llc/>), a Marco Island, Florida software company that creates customized solutions with enterprise-level features yet designed and priced to serve and scale with entry-level businesses, has continued its environmental sustainability commitment by renewing and extending its Edenark Group ISO 14001 sustainability certification through 2023.

The Edenark Group ISO 14001 is the world’s premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world’s most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

“Serving people and protecting our community is at the core of the DataSetGo culture. We choose to walk the talk and be part of the solution,” said Jessica Anne Clarke, CEO of DataSetGo. “Our software model allows our product to scale and grow as our client grows. We like the fact that the Edenark Group ISO 14001 program follows the same philosophy of progressive improvement, allowing us to continue to grow and improve in our sustainability effort,” added Clarke.

“Further, and very exciting and satisfying for us, is we are a vendor to a company (TruPayroll - <https://edenark.com/trupayroll-has-renewed-its-environmental-sustainability-certification-through-2023/>) which is also a certified sustainable business; and both organizations recognize this is an important component of each company’s DNA, impacting the other’s decision to pursue the relationship,” said Clarke.

“In 2022, while also rebuilding from the impact of the pandemic, our team was able to complete a number of projects, including cross training employees to reduce downtime and energy usage, reduced travel, replacing coaxial with fiber, digital invoices, elimination of plastic bottles, elimination of Styrofoam cups, and interacting with vendors and clients to suggest they become sustainable. Further, the Green Team has an exciting list of projects scheduled for 2023,” added Clarke.

“Edenark Group has a wonderful relationship with DataSetGo and they are an example of what the world needs more of – an organization that produces a superior product, supports its current stakeholders, shows it cares about future generations via its commitment to sustainability certification, and makes more money due to its sustainability programs,” said David Goodman, CEO of Edenark Group. “When an organization executes the Edenark Group ISO 14001 sustainability certification, as DataSetGo is doing, it not only benefits the environment, but it also benefits its own operation and its clients,” added Goodman.
