

# Wholesale Payroll

## Wholesale Payroll has renewed its Environmental Sustainability Certification through 2023

Wholesale Payroll (<https://wholesalepayroll.com/>), a Marco Island, Florida customer-focused, feature-rich, do-it-yourself payroll platform company, has continued its environmental sustainability commitment by renewing and extending its Edenark Group ISO 14001 sustainability certification through 2023.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world's most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"Helping our clients achieve their goals while also operating our company in a fashion that protects our community and environment, is at the core of the Wholesale Payroll culture. We choose to be part of the solution and show other organizations how easy it is to grow your company while also doing good things for the world," said CFO, James Murray, of Wholesale Payroll.

"Equally exciting, we are working with other organizations that have the same core beliefs. We purchase services via DataSetGo, which has also renewed its certification (<https://edenark.com/datasetgo-has-renewed-its-environmental-sustainability-certification-through-2023/>); and we provide services to, among others, TruPayroll, which also has renewed its certification (<https://edenark.com/trupayroll-has-renewed-its-environmental-sustainability-certification-through-2023/>). It is wonderful to work with vendors and clients that believe as you do: that you can provide superior service to clients and a wonderful work environment for employees; while also serving the greater good for your community and planet," added Murray.

“In 2022, while also rebuilding from the impact of the pandemic, our team was able to complete a number of projects, including reduced travel, using social media to promote sustainability, elimination of plastic bottles, elimination of Styrofoam cups, and interacting with vendors and clients to suggest they become sustainable. Further, the Green Team has an exciting list of projects scheduled for 2023,” added Murray.

“Edenark Group has a wonderful relationship with Wholesale Payroll and they are an example of what the world needs more of – an organization that produces a superior product, supports its current stakeholders, shows it cares about future generations via its commitment to sustainability certification, and makes more money due to its sustainability programs,” said David Goodman, CEO of Edenark Group. “When an organization executes the Edenark Group ISO 14001 sustainability certification, as Wholesale Payroll is doing, it not only benefits the environment, but it also benefits its own operation and its clients,” added Goodman.
