

ExpandOS Will Pursue Sustainability Certification, Carbon Neutrality and ESG Compliance

Transformation Packaging LLC (TPL) of Hebron, OH, makes ExpandOS (<https://expandos.com/>), a sustainably sourced, paper-based protective packaging material that replaces bubble cushioning and foam. Gulfstream Aerospace, Cummins Diesel, Epsom, and many other companies in automotive, ceramics, glass, and tableware industries have turned away from single-use plastics and adopted ExpandOS to protect their valuable products during shipment. TPL will work with Edenark Group to attain the Edenark Group ISO 14001 environmental sustainability certification. TPL is already recognized by the Sustainable Forestry Initiative (“SFI”) under the SFI 2022 Certified Sourcing Standard. Once certified sustainable, TPL will further help others improve their environmental profiles, sustainability commitments, and Scope 1 and 3 performance, through their use of the ExpandOS packaging material.

The Edenark Group ISO 14001 is the world’s premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world’s most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

“ExpandOS is leading the movement to replace single use plastics in protective packaging material and to enable high volume parcel shippers to use a paper-based product that outperforms plastics in cost, protection, labor, and environmental impact” said David Allon, president of Transformation Packaging. “We are dedicated to the sustainability movement across all sectors of the economy and believe we can have a tremendous impact on plastic waste generated by parcel shipments. The Edenark Group ISO 14001 platform shares our vision. We look forward to engaging with Edenark to benefit our investors, our clients, our employees, our company and our community.”

"When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up. They are setting a higher bar for their organization and sending a signal to all those around them," says David Goodman, CEO of Edenark Group. "They are agreeing to adhere to the world's Gold standard for sustainability certification; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improving in every way."
