

DCRBN will pursue Sustainability Certification Compliance

DCRBN (<https://dcrbn.io/>) is a next-gen accelerator helping build and scale web3 companies that prioritize delivering carbon-neutral solutions to real world problems. DCRBN helps founders build, brand, and scale their innovations with resources encompassing market research, development, business development, growth hacking, design, fundraising and more. The company has decided to pursue the Edenark Group ISO 14001 environmental sustainability certification program to set the standard for sustainability compliance.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world's most popular environmental certification standard via a program designed and priced specifically for them. This allows an organization to validate its environmental / sustainability / green / eco-friendly actions.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"DCRBN, as an accelerator, has a mandate to only incubate and scale sustainability-minded tech companies. So, as a tech company ourselves, becoming environmentally certified sustainable is mission critical," said Co-Founder, Cory Warfield. "The Edenark Group ISO 14001 platform allows us to have the world's top program and will benefit all our stakeholders; our clients, our company and bring sustainability standards to our community," added Co-Founder, Majid Zafer.

"When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up. They are setting a higher bar for their organization and sending a message to all those around them that may be claiming to be environmentally-supportive, but do not validate their actions with a global 3rd party certification," says David Goodman, CEO of Edenark Group. "Certified sustainable companies are agreeing to adhere to the world's Gold standard for sustainability certification; are allowing their actions to be reviewed; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improving in every way."
