

Sustainable Performance Solutions, LLC has renewed its Environmental Sustainability Certification through 2024

Sustainable Performance Solutions(<https://www.susperfsol.com/>), a Florida-based engineering firm whose practice is limited to energy and sustainability consulting, has continued its environmental sustainability commitment by renewing and extending its Edenark Group ISO 14001 sustainability certification through 2024.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) a program designed and priced specifically for them.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"We provide all levels of energy audits, general energy efficiency and sustainability studies, energy modeling, various certifications, commissioning, metering and sub-metering, and advanced ventilation strategies", said Larry Clark, principal in Sustainable Performance Solutions. "We are a leading sustainability voice, advisor and provider in Florida and the Caribbean. We have worked with Edenark Group for years and our views, expectations and standards align with their views, expectations and standards," added Clark.

"Sustainability is not a one-and-done event. It is a process of continual improvement. Any organization that claims to be sustainable and does not have an annual certification via a globally-recognized program with 3rd party verification is greenwashing; they are promoting actions not validated. When an organization attains and renews the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up; they are setting a higher bar for their organization and sending a signal to all those around them," says David Goodman, CEO of Edenark Group. "They are agreeing to adhere to the world's Gold standard for sustainability certification; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improve in every way."
