

Sea Coast Professional Window & Door has renewed its Environmental Sustainability Certification through 2024

Sea Coast Professional Window & Door (<https://www.prowinfl.com/>), a Florida-based window and door sales and installation company has renewed its environmental sustainability commitment by renewing and extending its Edenark Group ISO 14001 sustainability certification through 2024.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) a program designed and priced specifically for them.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"We provide window and door design, sales, installation and service to residential and commercial clients in Florida and the Caribbean", said Mike Modica, President of Sea Coast Professional Window & Door. "We are a leading window and door installer and our products help reduce energy usage in the buildings we serve. We have worked with Edenark Group for years and its leader, who has experience with high performance windows and doors, has the same high standards we have in our operation," added Modica.

"Sustainability is not a one-and-done event. It is a process of continual improvement. Any organization that claims to be sustainable and does not have an annual certification via a globally-recognized program with 3rd party verification is greenwashing; they are promoting actions not validated. When an organization attains and renews the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up; they are setting a higher bar for their organization and sending a signal to all those around them," says David Goodman, CEO of Edenark Group. "They are agreeing to adhere to the world's Gold standard for sustainability certification; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improve in every way."
